

hibrow BROW STAIN & DEVELOPER

INSTRUCTIONS FOR MANUAL APPLICATION

Available in Light Brown, Medium Brown, Dark Brown & Brown Black.

Hi Brow Stain is suitable for manual application and for use with an airbrush.

(EN) IMPORTANT! FOR PROFESSIONAL USE

FOLLOW DIRECTIONS CAREFULLY

It is important to carry out an allergy alert test 48 hours before each application of brow stain. To perform the test, mix a small pea sized quantity of stain (typically the main colour to be used during the treatment) with a few drops of developer. Carefully apply a small dot of mixed stain to the back of the ear or crease of the elbow using a cotton bud.

Gently cover and leave on the skin for 48 hours then wipe clean. If no rash or irritation occurs, continue with treatment.

- Do not use if eyes/skin are sore or irritated.
- Brow tinting should be performed before waxing.
- Do not use on eyebrows that have been plucked/waxed within the previous 24 hours.
- Avoid getting mixture into the eye. If this occurs, immediately flush well with warm water and seek medical advice if irritation continues after a few hours.
- Once brow stain is mixed with brow stain developer, use within 15 - 20 minutes.

FOLLOW DIRECTIONS CAREFULLY

- Protect working area and if possible wear protective gloves.
- Cleanse the brow area and allow skin to dry.
- Apply a barrier cream to the skin around the eyebrow, avoiding any hairs that require tinting.
- Shake the brow stain and brow developer bottles well before use.
Add 4 drops of stain with 2 drops of brow developer into a mixing dish. Mix until combined. If you need to mix more, for every 2 drops of stain, add in 1 drop of developer.
- **IMPORTANT:** The mixture may appear a different colour at first, but it will develop into the intended colour as you mix and apply it.
- Apply the stain mixture to the intended areas, creating your desired shape. For a deeper effect, you can apply a thin second layer. Allow the stain to develop:

Hair Texture	Soft Colour Stain	Strong Colour Stain
Fine - Medium	2-5 Minutes	6-10 Minutes
Medium - Thick	3-6 Minutes	8-10 Minutes

- After the required time has passed, remove the stain with a dry cotton pad. Gently wipe the stain in a single direction in the direction of hair growth.
- For subtle results, you can remove the tint with a damp cotton pad.
- For ombre results: Apply tint across the brow, and remove in sections according to time. For best

results leave tint on the front of the brow for 2 - 4 minutes, the arch for 4 - 6 minutes and the tail for 6 - 10 minutes. Repeat if necessary.

TOP TIPS AND AFTERCARE

The longevity of colour on the skin varies according to the skin type and attention to the correct aftercare.

- Advise the client not to get their brows wet for 24 hours after the treatment to enable maximum longevity of colour.
- Consult with your client as to the shade and depth of colour required.
- Brow colour will continue to develop after the tint is removed. To prevent this occurring, remove tint with damp cotton wool.

CAUTION

Remember to factor in natural hair colour, texture and desired effect when deciding on the processing time. Colour can always be added by repeating the tinting process, but it is very difficult to lighten once hair has been treated.

USEFUL TIP

Protect clothes, fabric, and all furnishings from tint as it is a permanent dye. Store at room temperature (22°C). A temperature higher or lower by 10°C will reduce the effectiveness of the product

WARNING

This product contains ingredients which may cause skin irritation to certain individuals, and when used for eyebrow tinting may cause injury to the eye. An allergy alert test must be carried out before each use. All clients should be advised to avoid exposure to chlorine and direct sunlight for at least 48 hours following the application of tint.

CAUTION AVOID CONTACT WITH EYES AND SKIN

Should contact occur, rinse immediately with copious quantities of tepid water. Avoid breathing vapour. If accidentally applied to skin or hair, remove, then flush with running water. If swallowed, DO NOT induce vomiting. Seek medical advice.

HAIR COLOURANTS CAN CAUSE SEVERE ALLERGIC REACTIONS.

The product is not intended for use on persons under the age 16. Temporary "black henna" tattoos may increase your risk of allergy. Do not colour your hair if you have a rash on your face or sensitive, irritated and damaged scalp; you have ever experienced any reaction to colouring your hair; you have ever experienced any reaction to a temporary "black henna" tattoo in the past.

The mixing ratios are detailed in this leaflet.

FOR PROFESSIONAL USE AND USE ONLY WHEN ADHERING TO THE SPECIFIC GUIDELINES WITHIN THIS LEAFLET.

Contains phenylenediamines. Wear suitable gloves. Light Brown Stain contains Resorcinol. Rinse eyes immediately if product comes into contact with them.

KEEP OUT OF REACH OF CHILDREN
